Poštovani kolegice i kolege,

Drago mi je da mogu najaviti „7 međunarodni kongres o hemodinamskom monitoriranju“ koji će se održati od 21.-22. veljače 2014.

Hemodinamski nadzor sastavni je dio liječenja vitalno ugroženih bolesnika. Zbog svog velikog značaja predstavlja važno područje za liječnike koji se bave intenzivnom medicinom.

U kliničku praksu uvode se nove manje invazivne metode koje pobuđuju veliki stručni interes. Uz to, primjena novijih vazoaktivnih lijekova u stanjima poremećaja hemodinamske funkcije također su od velikog interesa.
